  - Github contributions
    - Just a timeline of commits not the total amount of work
    - Not all the commits are showing so the picture below is not an accurate tale of what has happened over the semester.
    - I worked on the account management (i.e., user login and management of their accounts). The work I did was uploaded to a separate repository until it was finished and could be merged with the rest of our project -Rebecca

- The email in my local github settings didn't match what was on my profile, so none of my commits appear. I worked on the user system and checkout system. -Ahman
